**Re: Suggested Restriction Requirement**

for patent application  
Serial # 10/763,918  
First named inventor: Cheifot  
Assignee: Tantalus Systems Corp.

Dear Sirs:

We suggest a restriction requirement directed to the invention claimed as "A method of homogenizing a network...", which is the subject of (informally) numbered claims 2000 - 2007, and we so elect without traverse. These claims are independent and distinct from (by way of non-limiting example) the invention claimed as "A method of achieving a desired complex action on an operating environment...", which is the subject of (informally) numbered claims 1000-1039. Applicant observes that claim 1000 recites a method of making a network of a base station and a plurality of endpoints act in a complex way on the operating environment, whereas claim 2000 recites a method of making the output of one heterogeneous element of a network appear to be of the same nature as the output of a second heterogeneous element of that network.

Upon Examiner's acceptance of applicant's suggestion and election, applicant will file a Preliminary Amendment to do, amongst other things, formally renumber the elected claims and otherwise conform them to the Patent Office rules.

Please amend your records to reflect the change of mailing address of the applicant from:

100-2955 Virtual Way  
Vancouver, BC  
Canada V5M 4X6

to

301-3480 Gilmore Way  
Burnaby, BC  
Canada V5G 4Y1

The telephone and fax communication coordinates remain the same.

Respectfully submitted,

Keith Martin, Co-inventor and Chief Technology Officer.
